MULTI-TOOL & ACCESSORI

STASH SYSTEM

Stash takes all of those moments when we've been left fumbling in backpacks or cursing our luck at leaving a multi-tool on the workbench.

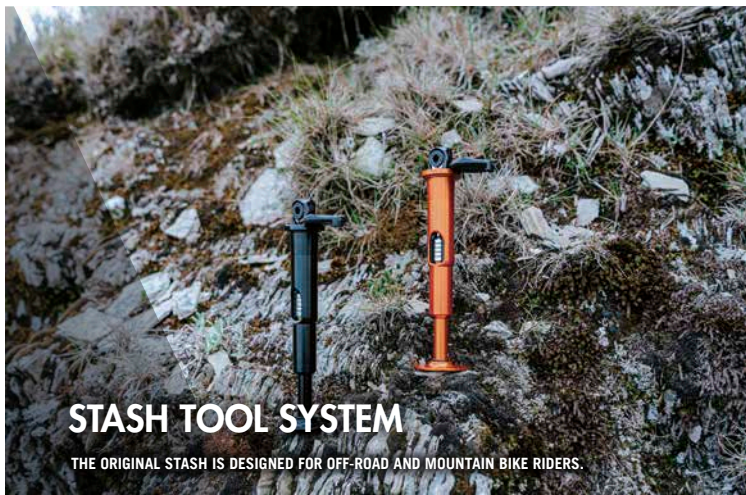

No more "where's my damn tool?" moments, no more bags-off at the trailhead delays and no more rides cut short by needless mechanicals.

Stash places a lightweight, multi-functional multi-tool right where you need it and firmly attached to your bike so it'll never be left behind. It stashes almost everything you'll ever need inside your steerer tube, ready to grab at a second's notice.

Compatible with alloy and carbon steerers and with versions of on and off-road, Stash means you'll never be left stranded and you'll never have to hold up your ride to find your tools.

Simply grab, adjust, stash and go.

STASH TOOL SYSTEM

THE ORIGINAL STASH IS DESIGNED FOR OFF-ROAD AND MOUNTAIN BIKE RIDERS.

STASH hides a small arsenal of tools elegantly in your steerer tube. They can be grabbed and deployed within seconds with no hold-ups on your ride and no need to rummage around in a bulky backpack.

Hidden away inside STASH has a mighty 9-piece multi-tool. With 2, 2.5, 3, 4, 5, 6, and 8mm Allen keys, a T25, and a PH1.

You should have everything to fix all but the worst of mechanical mishaps.

At just 159g the system is super light and won't do anything to upset the feel of your ride. Unlike the competition, it can be fitted quickly and easily with no tapping of your steerer required.

STASH RT RATCHET TOOL KIT is compatible with alloy steerer tubes.

STASH RT RATCHET TOOL KIT

Light weight storage for essential tools, hidden away in your steerer tube.

The tool kit includes a ratchet wrench and 9 tool bits. The extended Ph1 bit can be used as a leverage arm. Weighs a mere 159g.

Installation is quick and easy with no tapping of your steerer required.

- 9-piece 2 / 2.5 / 3 / 4 / 5 / 6 / 8 / T25 / PH1
- System weight (incl. multi-tool) 159g
- Color Black / Orange

Ratchet Socket Set

STASH RCX MULTI-TOOL KIT

THE GRANITE DESIGN STASH RCX MULTI-TOOL IS A 2021 DESIGN & INNOVATION AWARD WINNER.

STASH RCX TOOL SYSTEM, designed specifically for road and gravel bikes.

Stash hides a tiny but mighty multi-tool neatly in the steerer tube of your drop-bar bike, accessible from the top cap of your stem. It can be grabbed, used and returned in seconds without interrupting the flow of your ride.

At just 110g for the complete system, the Granite RCX is super lightweight and won't do anything to hold you back or interrupt the clean lines of your ride.

The RCX can be fitted quickly and easily without specialist tools or any tapping of your steerer tube. Simply remove the star-nut from your fork and replace it with the RCX's innovative compression plug using a 5mm hex key. Once installed, the plug provides a simple and secure mounting point for the RCX tool.

STASH RCX MULTI-TOOL KIT is compatible with alloy and carbon steerer tubes.

STRAP SOLUTION

The Granite Design Strap collection upgrades your bike with added storage.

Simple to use, rock-solid and quick-to-access our strap systems attach those must-have essentials to your frame. They add extra storage to your bike and eliminate the need for bulky backpacks or over-full fanny packs.

They're the answer to riders that don't have bottle bosses on their frames, hate backpacks or simply need to carry some extra gear.

By fixing tubes, pumps, tools, snacks (and whatever else you need!) to your frame you'll never be left without and never be slowed down by rummaging in packs to find what you need.

QUIVER TOOL ROLL

QUIVER KEEPS YOUR EXTRA KIT WITHIN REACH AND ALLOWS YOU TO SWAP IT BETWEEN BIKES.

The Quiver will look after your extra tools, a spare tube, and even spare change or a credit card for a long day ride. It's quick and easy to attach and release, giving rapid access to your stuff, and allowing you to swap it between bikes, making it the most versatile bike storage solution around.

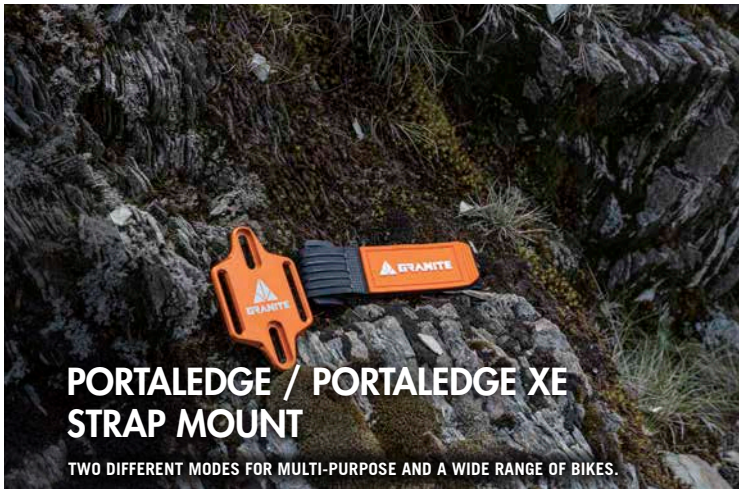

QUIVER TOOL ROLL

The Quiver is a simple roll-up tool bag that allows you to carry any extra kit you need safely and securely. The evolution of the humble saddle bag, the Quiver will look after your extra tools, a spare tube*, and even spare change or a credit card for a long day ride.

It incorporates not only the same D30® innovations as the MOTION TOP 2, but also features a high-performance chest protection. EVA pads on each side complete this protection. Three storage pockets have been incorporated, as well as reinforcing elastics in the chest and back protection for a better fit. This new woman dedicated version keeps the MOTION TOP 2 assets such as the YKK® full zip, water bag insert, the removable sleeves, and the anti-odor and antibacterial ATR® treatment. Ergonomic and stylish, the MOTION TOP WOMEN is the new reference on the market. It is CE level 1 approved.

/IT

Il MOTION TOP WOMEN conserva la stessa leggerezza e tecnicità della versione per uomo. Molto traspirante grazie all'utilizzo del nuovo tessuto mesh sottilissimo e resistente, questo articolo hi-tech si adatta a tutte le morfologie femminili. Non solo offre le stesse innovazioni D30® di MOTION TOP 2, ma è anche munito di una protezione pettorale dalle alte prestazioni. Dei pad in schiuma EVA bilaterali completano la protezione. Nell'articolo sono presenti 3 tasche portaoggetti, nonché elastici di rinforzo a livello della protezione pettorale e dorsale per un migliore supporto. Questa nuova versione dedicata alle donne conserva i punti di forza di MOTION TOP 2 come la zip integrale YKK®, la compatibilità con le sacche d'acqua, le maniche rimovibili e un trattamento anti-odore e antibatterico ATR®. Ergonomico e dal look straordinario, MOTION TOP WOMEN costituisce un punto di riferimento sul mercato. Omologato CE livello 1.

PROTECTION - PERFORMANCE ET INNOVATION

La conception d'une gamme imaginée par Racer, intègre les éléments essentiels à toute pratique sportive. De fait, tous nos produits répondent aux besoins suivants : ils doivent être pratiques, confortables, élégants mais aussi et surtout protecteurs, notamment pour les pratiques à risques. C'est pour cela que nous avons décidé de nous associer avec les meilleurs partenaires techniques en termes de protections corporelles.

D3O[®]

RACER[®] x D3O[®]

En 2006 Racer Gloves fut l'une des toutes premières marques à travailler avec la société britannique D3O[®]. Ce matériau magique composé de polymères de couleur orange, a la particularité exceptionnelle de changer son comportement mécanique selon si elle subit une pression lente ou un impact rapide. De manière concrète, lorsqu'on appuie avec son doigt, la matière va rester souple et malléable comme du simple caoutchouc. Cependant si vous venez à frapper la matière d'une manière violente, les composants du D3O[®] vont se lier entre eux pour former une barrière contre les chocs et les vibrations avant de retourner à son état souple. Cette extraordinaire capacité à absorber les chocs doublés par une souplesse et une légèreté exemplaire ont séduit de nombreuses marques et utilisateurs dans les domaines de l'électronique, de la défense et du sport bien évidemment. Racer équipe tous ses produits les plus élaborés de D3O[®], que ce soient les gilets, les gants en passant par les genouillères et les coudières.

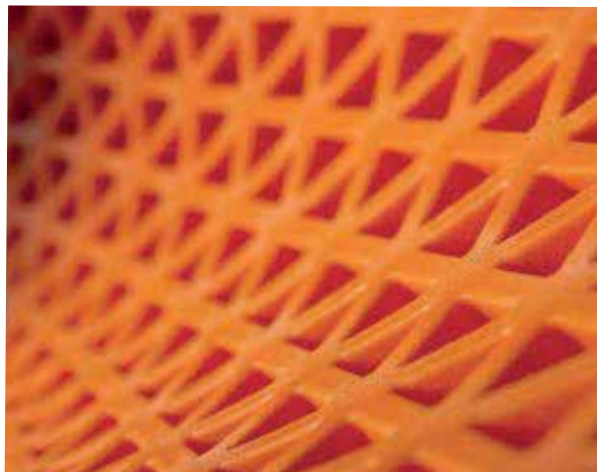

In 2006, Racer Gloves was one of the very first brands to work with the British company D3O[®]. This magical material, consisting of orange-coloured polymers, has the exceptional feature of changing its mechanical behaviour, depending on whether it is subjected to slow pressure or rapid impact. More specifically, when you press with your finger, the material will remain soft and malleable, like normal rubber. However, if you strike the material violently, the components of the D3O[®] will bond together to form a barrier against the shock and vibration, before returning to its soft state.

SAS-TEC
body protection systems

RACER[®] x SAS-TEC

Pour ses protections, Racer travaille également avec un autre acteur Européen majeur de la protection corporelle : la société Allemande SAS-TEC. Créée en 2004, elle fournit Racer depuis 2015 pour la conception d'une partie de ses protections vélos et notamment les gilets et genouillères. Le matériau qu'ils conçoivent est viscoélastique avec mémoire de forme c'est-à-dire que lors d'un choc la matière va se déformer et se durcir pour absorber l'énergie de l'impact puis reprendre sa forme d'origine et tout cela en un temps extrêmement rapide. C'est l'air contenu dans les cellules qui composent la matière qui est responsable de ce tour de force et qui absorbe progressivement le choc selon la violence de celui-ci. En cela, on retrouve des similitudes avec le D3O[®]. Ce n'est d'ailleurs pas pour rien qu'ils sont tous deux des acteurs incontournables lorsqu'il s'agit de protections corporelles.

For its protective gear, Racer also works with another major European player in body protection: the German company SAS-TEC. Created in 2004, it has been supplying Racer since 2015 with designs for some of its bicycle protection products, in particular the jackets and knee pads. The material they design is viscoelastic with shape memory, which means that during an impact, the material will become distorted and rigid to absorb the energy of the impact, and then return to its original shape, all in an extremely short period of time.
